

#### **Annex 4: Biological Information of *Sardinella jusseui***

Central Marine Fisheries Research Institute (CMFRI) reported that the species *Sardinella jusseui* (Valenciennes 1847) is not being landed along the Karnataka coast. As per the literature available, Hata and Motomura (2019), the *Sardinella jusseui* which was identified earlier is a misidentification, and the consideration of *S. jusseui* in India, Sri Lanka, Madagascar, and Mauritius was treated as a senior synonym of *S. dayi*, and the distribution range of *S* limited to Madagascar and Mauritius (Sauvage 1891; Hata and Motomura 2019) Hence, providing data on *S. jusseui* is not possible.
